

Fellowship Report: February 2018 - May 2018:

Fellow to Dr. Bertrand Sonnery-Cottet

Experience of Life-time!!!

If you wish to be a part of the team committed to providing world-class treatment and contribute immensely to the current developments in orthopedic surgery; then Centre Orthopadique Santy is the place to be!!!

I was fortunate to have the experience of a life-time with Dr. Bertrand Sonnery-Cottet from February 26th to April 30th 2018. Being a part of his team I experienced learning every moment I spent with him. His attitude towards looking at a problem as an opportunity to find a solution is worth applying to every challenge you face in life. He is a mentor who guides you through the most simple and effective techniques in knee surgery. He imbibes thinking capacity and expands your horizon of thoughts to approach a patient with knee pathology. He is a friend in your journey of learning.

Certainly Santy is a place where you will come across the most inquisitive, hard working and committed colleagues from all parts of the world. You will always be under the influence of healthy competition and will constantly feel the need to perform better and approximate perfection. Dr. Bertrand is the magician who creates an atmosphere of positivity and hard work for his fellows, which helps them understand and match the international standards in knee surgery.

My experience at Santy has been the major boost for me to evolve as a surgeon. I am sure that the Santy family will grow by leaps and bounds every year and will shine like a star all around the globe.

Cheers to SANTY!!!!

Dr. Vikram Kandhari.
